

# How to use our data consultancy service

## If you need specific knowledge and expertise

The DataHub community consists of [a multi-disciplinary team](#). Next to several data engineers/bio-informaticians, a DevOps engineer, information & program managers, DataHub has strategic partnerships with MEMIC, CTCM, the Research Office and many more. All this knowledge brought together at one place enables us to deliver a wide range of knowledge and expertise.

### Connecting you with the appropriate consultant

1. Browse through the DataHub Portal
  - a. Browse through the Frequently Asked Questions
  - b. Browse through the How to's
  - c. Search via the "Search field" in the upper right corner
2. Describe your case
  - a. It would be best to setup a Data Management Plan and share it with the consultant
  - b. Based on a (short) written description we can search for an appropriate consultant
3. Get in touch
  - a. Preferably by mail
  - b. More options can be found on [How to get support](#)
